Re: J. L. Greenwood #11-I  
Sec. 9, T22S, R37E  
Blinebry Pool

Gentlemen:

We recently received a gas disconnect notice for the Blinebry Pool for your J. L. Greenwood #11 from El Paso Natural Gas.

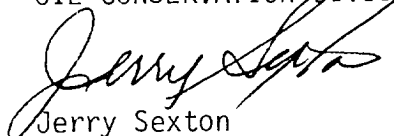

This well is a downhole commingled Blinebry and Drinkard as authorized by DHC-593. Since the Blinebry zone was classified as gas when the well was downhole commingled it should remain gas. Therefore, I do not see why we received a disconnect for the Blinebry since you are currently reporting production from both zones on your C-115.

It is the operator's responsibility to advise the transporter of the commingling authority and to make certain the transporter reports the gas takes (on his C-111) according to the percentages set out in the DHC order for a prorated gas zone. This is the only way the gas production for the gas allowable schedule can be picked up.

Please advise status of this well.

Very truly yours,

OIL CONSERVATION DIVISION
