Well No. 4 is located 2310 ft. from N line and 330 ft. from W line of sec. 9  
NW/4 Sec. 9 22-5 37E NMPM  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Drinkard Lee New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is \_\_\_\_\_ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this test to the Drinkard pay and complete it by setting and cementing 5 1/2" OD casing at approximately 6500' and producing from the open hole to about 6575.  
 The following casing program is expected to be followed:

10 3/4" @ 165' with 165 sx. cement & 36 hrs. set time  
 7 5/8" @ 2800' with 1300 sx. cement & 48 hrs set time  
 5 1/2" @ 6500' with 500 sx. cement & 72 hrs. set time

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
