

INSTRUCTIONS

Mail original to Oil Conservation Commission, Santa Fe, New Mexico, and one copy to Lea County Operators, Hobbs, New Mexico.

This report shall be mailed to the Commission on or before the 15th of the month following the three-month period in which the well is scheduled to be tested. The ratios, as reported, shall become effective for proration purposes the first of the month following the end of the quarter in which the test is scheduled to be made. Failure to make the required test and report will be penalized as the Commission's Regulations provide.

Note ("producing methods"), show flowing, pumping, or gas lift. Where ("some"), show the duration of the test in hours, which includes all the time the well is open for production of oil or gas during the 24 hour test period. The allowable is the daily allowable for the well at the time of test.

METHOD OF TESTING: Produce each well in the normal operating manner and the customary production rate and measure all gas, oil and water produced during 24 hours.

MEASUREMENTS: Shall be made in accordance with the directions of the Commission effective January 15, 1945. In computing the gas-oil ratio on gas lift wells, input is subtracted from output to obtain net gas volume.

STANDARD BASE: 14.4 lbs. per inch plus 10 oz. Specific Gravity 0.85. Temperature 60° F.
