Attention: Mr. Joe D. Ramey

Gentlemen:

Skelly Oil Company respectfully requests administrative approval to dual complete the Baker "B" Well No. 7 in the Tubb Gas and Drinkard Oil zones. This well is located 1,980' FSL and 1,980' FEL, Section 10, T22S, R37E, NMPM, Lea County, New Mexico and was drilled and completed in June, 1947, as a Drinkard producer. In April, 1971, the well was plugged back and completed as a single Tubb Gas zone producer as a replacement Tubb zone completion for the twin well (Baker "B" No. 15). It is proposed to effect completion in the Drinkard Oil zone and dual with the existing Tubb Gas zone.

Attached are: A completed Form C-107; a plat showing all wells on the lease and all offset wells on offset leases; and a diagrammatic sketch of the multiple completion showing casing strings and cementing details, tubing strings and setting details, location of packers and associated equipment, and perforated intervals.

*Should waivers from all offset operators not accompany an application for administrative approval, the New Mexico Oil Conservation Commission will hold the application for a period of twenty (20) days from date of receipt by the Commission's Santa Fe office. If, after said twenty-day period, no protest nor request for hearing is received by the Santa Fe office, the application will then be processed.

NOTE: If the proposed multiple completion will result in an unorthodox well location and/or a non-standard proration unit in one or more of the producing zones, then separate application for approval of the same should be filed simultaneously with this application.
