Subject: Downhole Commingle
Baker "B" #2-K, Sec. 10, T22S, R37E
Penrose Skelly Grayburg & Eumont Y-SR-Qn

Dear Mr. Catanach:

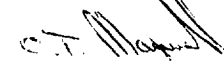

Enclosed are the Bottom Hole Pressure test results of BEC Corporation's Baker "B" #2 well.

They are self explanatory and should fulfill the remaining downhole commingling requirements as we understand them.

The two zones are currently segregated via a Model D packer. We will resume commingled production pending your approval.

Respectfully,

BEC CORPORATION

O. T. Maxwell
Production Superintendent
