1. The first part of the paper is devoted to the

study of the properties of the

operator T defined by the formula

$$Tf(x) = \int_0^x f(t) dt$$

for $f \in L^p(\mathbb{R})$, $1 < p < \infty$.

It is shown that the operator T is bounded in $L^p(\mathbb{R})$ and that its norm is equal to 1. The second part of the paper is devoted to the study of the properties of the operator T defined by the formula

$$Tf(x) = \int_0^x f(t) dt$$

for $f \in L^p(\mathbb{R})$, $1 < p < \infty$.

It is shown that the operator T is bounded in $L^p(\mathbb{R})$ and that its norm is equal to 1.

The third part of the paper is devoted to the study of the properties of the operator T defined by the formula

$$Tf(x) = \int_0^x f(t) dt$$

for $f \in L^p(\mathbb{R})$, $1 < p < \infty$. It is shown that the operator T is bounded in $L^p(\mathbb{R})$ and that its norm is equal to 1.

The fourth part of the paper is devoted to the study of the properties of the operator T defined by the formula

$$Tf(x) = \int_0^x f(t) dt$$

for $f \in L^p(\mathbb{R})$, $1 < p < \infty$. It is shown that the operator T is bounded in $L^p(\mathbb{R})$ and that its norm is equal to 1.

The fifth part of the paper is devoted to the study of the properties of the operator T defined by the formula

$$Tf(x) = \int_0^x f(t) dt$$

for $f \in L^p(\mathbb{R})$, $1 < p < \infty$. It is shown that the operator T is bounded in $L^p(\mathbb{R})$ and that its norm is equal to 1.

The sixth part of the paper is devoted to the study of the properties of the operator T defined by the formula

$$Tf(x) = \int_0^x f(t) dt$$

for $f \in L^p(\mathbb{R})$, $1 < p < \infty$.

It is shown that the operator T is bounded in $L^p(\mathbb{R})$ and that its norm is equal to 1.

The seventh part of the paper is devoted to the study of the properties of the operator T defined by the formula

$$Tf(x) = \int_0^x f(t) dt$$

for $f \in L^p(\mathbb{R})$, $1 < p < \infty$. It is shown that the operator T is bounded in $L^p(\mathbb{R})$ and that its norm is equal to 1.
