May 19, 1954

Mr. R. R. Spurrier
New Mexico Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Dear Sir:

The Ohio Oil Company respectfully requests that the Oil Conservation Commission of New Mexico grant this application of Ohio for authorization to dually complete its Lou Worthan Well No. 9, in Section 11, Township 22-S, Range 37-E in the area of the Drinkard Pool, Lea County, New Mexico.

Administrative order of the Oil Conservation Commission No. DC-60, dated January 29, 1954 granted the Ohio Oil Company permission to dually complete its Lou Worthan Well No. 9 in the Drinkard oil zone and the Tubb gas zone. However, during remedial work on the Drinkard zone, it was discovered that this zone was non-commercial. Therefore, the Ohio is desirous of completing this well dually in the Blinebry gas zone and the Tubb gas zone in such a manner as to produce Tubb gas through the tubing and Blinebry gas through the annulus between the tubing and casing. Ohio intends to install such efficient packer in this well and perform completion of this well in such a manner as will prevent waste in either reservoir.

Subsequent to completion of the work, Ohio will present data showing the completion program of this well and plans for future tests to be made regularly to determine that waste is not occurring in either reservoir.

Respectfully submitted,

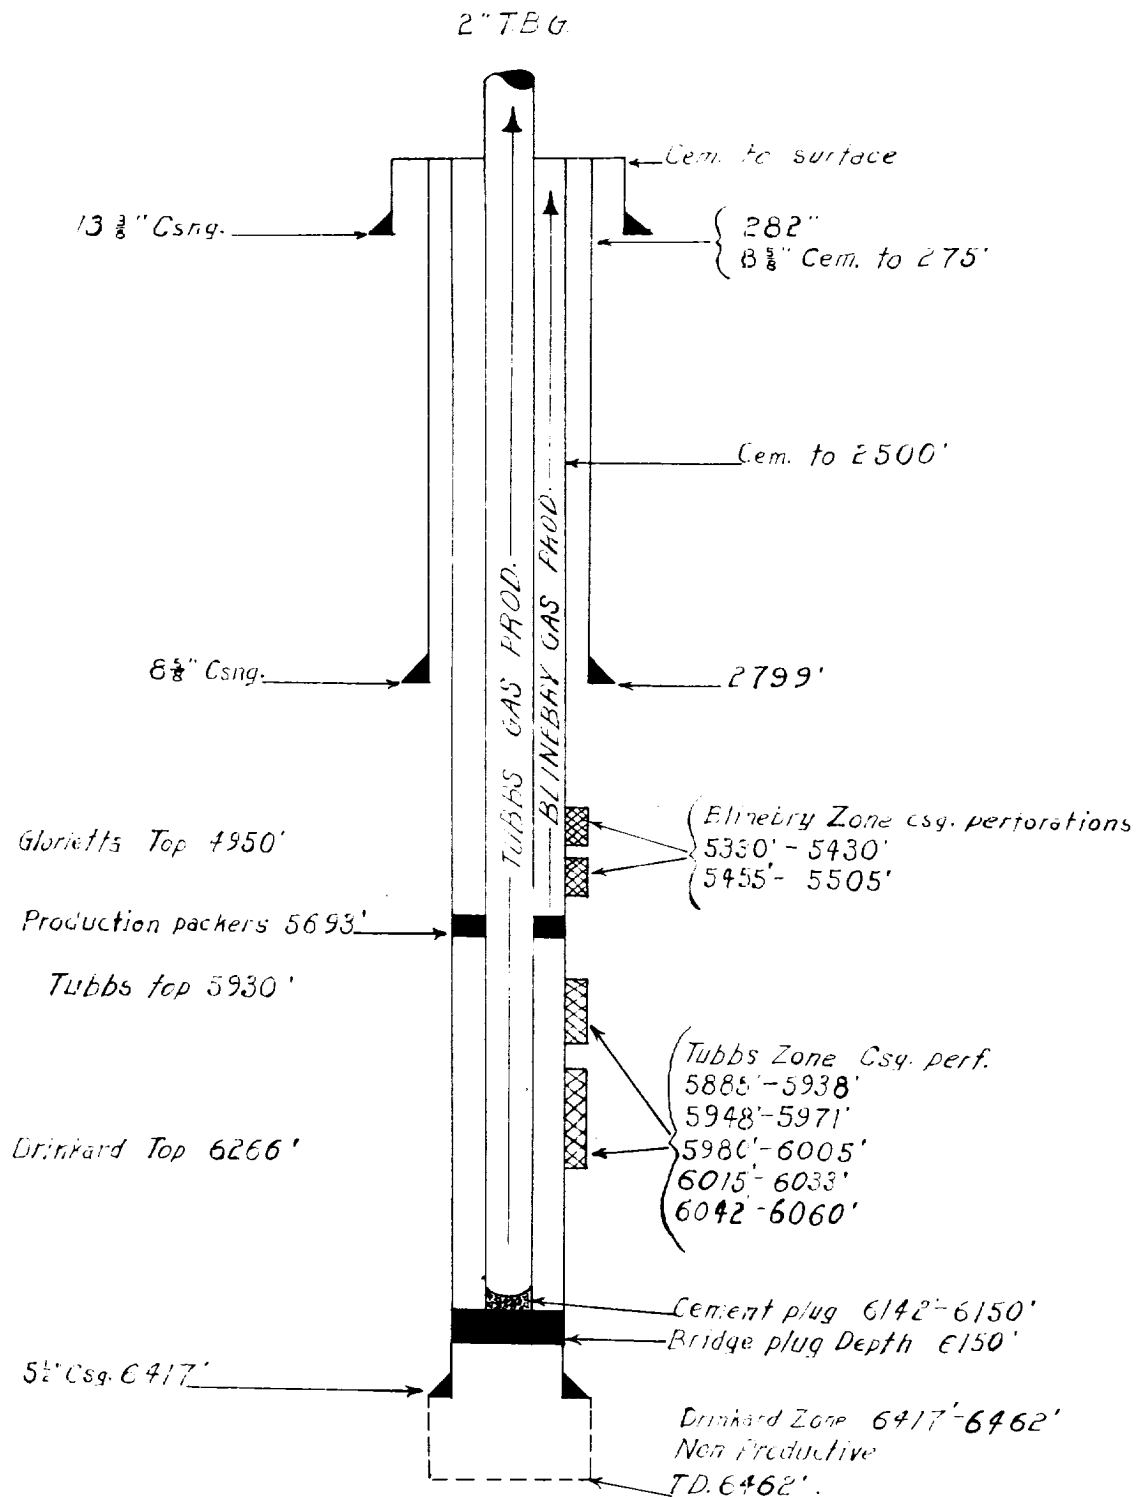

THE OHIO OIL COMPANY

D. K. Spellman, Jr.
D. K. Spellman, Jr.
District Petroleum Engineer
