12. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

Marathon Oil Company proposes the downhole commingling of the Tubb and Drinkard formations of the Lou Worthan Well No. 11. The Tubb currently produces 2 BOPD and 158 MCF. By drilling out a CIBP at 6180' (PBTD of 6157') and rod pumping both zones the Drinkard is expected to produce 150 MCFD with a combined rate of 2 BO, 308 MCFD and +/- 2 BOPD. This project will commence upon NMOCD approval of the downhole commingling request.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
