Subject: Application for authority to dually
complete The Ohio Oil Company's
Lou Worthan Well No. 11, Tubb Gas
Pool

Mr. A. L. Porter, Jr
New Mexico Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Dear Mr. Porter:

The Ohio Oil Company respectfully requests that the Oil Conservation Commission grant this application of The Ohio for authorization to dually complete its Lou Worthan Well No. 11, located in the SE/4 of the NW/4 of Section 11, T-22-S, R-37-E, Lea County, New Mexico, now producing in the Drinkard Pool.

The Ohio desires to dually complete this well in the Tubb Gas Pool in such a manner as to produce gas through the annulus between the casing and the tubing, and to continue producing oil from the Drinkard Pool through the tubing. The Ohio intends to install an efficient packer between the two zones and to perform the completion so as to prevent waste in each reservoir. A schematic diagram showing the proposed method for dual completion is attached. A plat is also attached hereto which indicates the location of the lease and the well and the location of surrounding tracts. A copy of this application, with diagram and plat attached, has been sent by registered mail to each of the operators named on the attached list.

Subsequent to the completion of the work, The Ohio will present to the Commission data showing the detailed completion program as well as plans for future testing which will be made regularly to determine that waste is not occurring in either reservoir.

Each and all of the foregoing statements are true and correct.

Respectfully submitted,

THE OHIO OIL COMPANY

By *Tom Steele*
