Re: Reclassification of Well
Rodgers Gas Com #1-A
Section 12, T22S, R37E
Tubb Oil & Gas Pool

Gentlemen:

The reported gas/oil ratio of 37,400/1 for the above-referenced well requires that it be reclassified from a gas well to an oil well in the Tubb Oil and Gas Pool effective January 1, 1988, and the gas allowable will be cancelled that date.

If for some reason you feel the recently submitted test does not reflect the proper classification of the well, please submit a new test for our consideration by November 25, 1987.

If the well is to be reclassified, it will be necessary to submit a revised acreage dedication plat outlining 40-acres for the oil well classification. If the gas transporter changes due to the reclassification, please submit Form C-104 so indicating.

Very truly yours,

OIL CONSERVATION DIVISION
