New Mexico Oil Conservation Commission
Attention of Mr. A. L. Porter, Jr.
P. O. Box 2045
Hobbs, New Mexico

Gentlemen:

Our F. J. Danglade #1 Blinebry Gas Pool well, which is located 660 feet from the West line and 1980 feet from the South line of Section 13-22S-37E, is presently assigned the N/2 SW/4 (80 acres) for gas proration purposes. It has been our plan since the inauguration of gas proration in the Blinebry Gas Pool to communitize our 80-acre Danglade Lease covering the N/2 of the SW/4 of Section 13-22S-37E, with the Gulf Oil Corporation's Danglade Lease covering the S/2 of the SW/4 of this same section to form a standard 160-acre gas proration unit comprising the quarter section. Agreement has been reached with Gulf Oil Corporation on the formation of this standard proration unit and the purpose of this letter is to request the assignment of Gulf Oil Corporation's 80 acres to our F. J. Danglade #1 for gas proration purposes.

The finalizing of the communization of working and royalty interests under the two 80-acre tracts is contingent upon our obtaining Conservation Commission approval of our request and the designation of the SW/4 of Section 13-22S-37E, as a standard gas proration unit for the Blinebry Gas Pool and the designation of our F. J. Danglade #1 as the unit well.

With this letter we are submitting a new gas well plat which shows dedication of 160 acres to our well. The Gulf Oil Corporation is being furnished a copy of this letter and will be requested to advise your office of their concurrence in this request.
