

Page 2

(g) With the granting of this application Drinkard oil will be produced through the tubing and Tubb gas will be produced through the casing tubing annulus.

(h) That the granting of this application to produce the well as a dual completion with gas from the Tubb Pool and oil from the Drinkard Pool is in the interest of conservation and the protection of correlative rights.

(i) That the applicant will comply with all rules and regulations of the New Mexico Oil Conservation Commission to maintain separation of production from the two pay zones.

(j) That the manner and method of the dual completion is mechanically feasible and practical.

(k) That by copy of this letter all offset operators are notified of this application.

Therefore, R. Olsen Oil Company requests that the Oil Conservation Commission grant permission to the applicant to produce the subject well as a dual completion as outlined in this application.

Respectfully submitted,

R. OLSEN OIL COMPANY
