

OIL CONSERVATION COMM.

HOBBS, NEW MEXICO

January 23, 1957

Neville G. Penrose, Inc.
Box 988
Eunice, New Mex.

Gentlemen:

A check of the files for your wells in the Blinbry Oil Pool shows that our records do not reflect a casinghead gas transporter for any of the following wells:

| | | |
|-----------|----------|----------|
| Hinton | No. 4-I | 12-22-37 |
| Hinton | No. 10-D | 13-22-37 |
| McAlester | No. 1-D | 7-22-38 |
| Rodgers | No. 2-H | 12-22-37 |

If you do have a casinghead gas connection, please file Form C-110 showing the authorized transporter; if you are flaring gas from any of the wells it will be necessary for you to apply for No-Flare Orders for these wells to comply with the provisions of Commission Order R-610.

Further, although the Oil Proration Schedule carries the Hinton No. 4 in the Blinbry Oil Pool, our records still show it to be in the Paddock Pool. Please bring our file up to date by filing Form C-103 on the work-over and Form C-110 showing the correct pool designation.

Yours very truly,

OIL CONSERVATION COMMISSION

R. F. Montgomery
Proration Manager
