RE: Application to Dually Complete
Rowan Oil Company
E. M. Elliott No. 1-B-13

New Mexico Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Gentlemen:

In support of the subject application the Rowan Oil Company submits the following:

1. The Rowan Oil Company No. 1-B-13 E. M. Elliott, SW/4 of NW/4 of Section 13, T-22-S, R-37-E, Lea County, was completed July 26, 1947, through perforations opposite the Blinbry formation from 5560-92' and 5615-35'. Attached is Exhibit "A" showing the location of this well, and the proposed 160 acre proration unit.
2. The subject well has 5 1/2" casing set at 6330' and cemented with 135 sacks of common cement. Well was plugged back with 50 sacks of cement to 6180' prior to completing in the Blinbry oil zone.
3. The applicant proposes to dually complete the subject well in the following manner:
 - a. Perforate the 5 1/2" casing within the approximate interval of 5450' to 5530' in the Blinbry Gas Pool.
 - b. Set production type packer below these perforations at approximately 5550' to separate the two pay zones.
 - c. Produce the Blinbry oil through the tubing and the Blinbry gas through the tubing-casing annulus.
4. The approval of this application to dually complete the subject well is in the interest of conservation and the protection of correlative

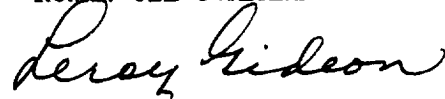

rights, and the operator will comply with all rules and regulations to maintain separation of production from the two pay zones.

5. A copy of this letter of application has been mailed to each offset operator.

The Rowan Oil Company respectfully requests the Oil Conservation Commission to grant permission to the applicant to complete the subject well as proposed in this application.

Yours very truly,

ROMAN OIL COMPANY
