Re: Packer Leakage Test  
Parks A #4-I 14-22-37 -- Tubb & Drinkard (DC-204)  
Parks #6-L 14-22-37 -- Tubb and Blinbry (DC-214)

Gentlemen:

The last packer leakage test received on the above-referenced wells was for 1985. In 1986 you submitted a notice that the #4 was shut in due to pipeline curtailment. You were granted an exception until such time as the well was returned to production.

We find that production is being reported from both wells and you are hereby requested to submit a packer leakage test. If these tests are not received, your allowable will be cancelled effective May 1, 1987.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton  
Supervisor, District I
