RE: RECLASSIFICATION OF WELL
Tubb Oil & Gas
E W Walden
#3-N, Sec.15, T-22S, R-37E

Gentlemen:

According to the recently submitted scheduled gas/oil ration test the above referenced well will be reclassified from an oil well to a gas well in the Tubb Oil & Gas Pool effective January 1, 1995.

If for some reason you feel this test does not reflect the proper classification of this well, please submit another test for our consideration by December 16, 1994.

If the well is to be reclassified from and oil well to a gas well please submit the following:

- 1) Revised C-102 outlining acreage to be dedicated to Tubb Gas Proration Unit. If proration unit size or well location requires addition approval, please furnish order number approving same or copy of your application for approval on NSP and/or NSL.
- 2). C-104 showing reclassification from oil to gas and designating transporters of condensate and dry gas.
- 3). Also, statement that gas well gas is separately metered.

If you have questions concerning the above, please contact Donna Pitzer (505) 393-6161.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton

		U N	S 15	T 22						R 37	WATER BBL.S 0	GRAV. OIL 1	

INSTRUCTIONS:

During gas-oil ratio test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which well is located by more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance in order that well can be assigned increased allowables when authorized by the Division.

Gas volumes must be reported in MCF measured at a pressure base of 15.025 psia and a temperature of 60° F. Specific gravity base will be 0.60.

Report casing pressure in lieu of tubing pressure for any well producing through casing.

See Rule 301, Rule 1116 & appropriate pool rules.)

I hereby certify that the above information is true and complete to the best of my knowledge and belief.
