This well was producing from the Tubb perfs 6000 - 6180. On 11/05/96, we set a CIBP at 5985' and dumped 4 sacks of cement on top. We then perforated the Blinbry from 5458-5894. Effective November 1, 1996, we will no longer carry this well in the Tubb zone on our C-115 because it has been zone abandoned.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
