Gentlemen:

Attached is Continental Oil Company's application to the
Oil Conservation Commission of New Mexico for permission to dually
complete its Elliott A-15 No. 6 well which is self explanatory.

This application is submitted to you as offset operators
in compliance with Rule 112-A (c).

Yours very truly,

W. E. Allen

WEA-PCM

BEFORE THE OIL CONSERVATION COMMISSION
OF THE
STATE OF NEW MEXICO

IN THE MATTER OF THE APPLICATION OF
CONTINENTAL OIL COMPANY FOR AN ORDER
GRANTING IT PERMISSION TO DUAL COMPLETE
ITS E. M. ELLIOTT A-15 NO. 6 SE/4
SE/4 SECTION 15, T. 22N, R. 37E, N.M.P.M.
LEA COUNTY, NEW MEXICO

A P P L I C A T I O N

Continental Oil Company, Inc., a Delaware Corporation,
hereinafter called "Applicant" and being duly requested the Oil
Conservation Commission of the State of New Mexico to issue an order
authorizing Applicant to dual complete its E. M. Elliott A-15 NO.
6 well, located 650 feet from the North line and 660 feet from the
East line of Section 15, T. 22N, R. 37E, N.M.P.M., Lea County, New
Mexico, in the Drinkard Oil Pool and the Blinbry Gas Pool, and in
support thereof would show the following:

The proposed gas unit contains 120 acres consisting of
contiguous quarter quarter sections.

The dual completion of said well in the Drinkard formation
for oil and the Blinbry formation for gas is in the interest of
conservation and the protection of accumulative rights.

Segregation of the producing intervals will be made by
appropriate packer installation and said well will be equipped so
there can be no coningling of well fluid in producing the gas through
the annulus between the tubing and casing, and the oil through the
tubing. Said well will be equipped in such a manner that reservoir
pressures may be determined separately for each of the two specified
pools and the well head equipment to be equipped with all necessary
connections to permit accurate measurement of any natural gas, oil,
or oil and gas produced from each separate pool as may be required
by the Commission.

Attached to this application is a plat showing the location
of the said well and surrounding wells and leaseholds with the acreage
to be assigned the proposed gas unit outlined in red and a plat showing
the mechanical condition of said well at present and after the proposed
dual completion.

All effect operators have been duly notified by copy of this application.

WHEREFORE, Applicant respectfully requests the Oil Conservation Commission of the State of New Mexico enter its order authorizing Applicant to fully complete said well in accordance with the foregoing application and rules and regulations of the Commission.
