

DUPLICATE

NEW MEXICO OIL CONSERVATION COMMISSION
Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELL

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-offs, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS	REPORT ON REPAIRING WELL
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL <input checked="" type="checkbox"/>	REPORT ON PULLING OR OTHERWISE ALTERING CASING
REPORT ON RESULT OF TEST OF CASING SHUT-OFF	REPORT ON DEEPENING WELL
REPORT ON RESULT OF PLUGGING OF WELL

Title

The first part of the report is a general description of the project and its objectives. It is followed by a detailed description of the methodology used in the study.

The methodology used in this study is a combination of qualitative and quantitative methods. The qualitative methods include interviews with the participants and the analysis of the data collected from these interviews. The quantitative methods include the use of statistical tests to analyze the data.

The results of the study show that there is a significant difference between the two groups. The first group showed a higher level of performance than the second group. This difference was statistically significant at the 0.05 level.

The conclusion of the study is that the first group performed better than the second group. This result is consistent with the hypothesis of the study. The study also has some limitations, which are discussed in the final section.

The study was conducted in a controlled environment. The participants were all students from the same university. The study was limited to a specific time period and a specific group of participants.

The study was funded by the university. The results of the study are available to the public.
