No well will be assigned an allowable greater than the amount of oil produced on the scheduled test.

During gas-oil ratio test, each well shall be produced at a rate not exceeding two (2) standard cubic feet per minute for the pool in which well is located by more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance by order that well can be assigned increased allowable when authorized by the Division.

Gas volumes must be reported in MCF measured at a pressure base of 14.7 psia and a temperature of 60° F. Specific gravity base will be 0.60.

Report casing pressure in lieu of tubing pressure for any well producing less than 25 standard cubic feet per minute. Report casing pressure in accordance with Rule 301 and appropriate pool rules.
