Re: E. Walden No. 6-D  
Sec. 15, T-22-S, R-37-E

Gentlemen:

In reply to your letter of August 6, 1956 concerning a gas allowable for your E. Walden No. 6, please be advised that it will be necessary for you to make application to the office of the Commission in Santa Fe for a non-standard proration unit for this well. We are enclosing a memorandum regarding the filing of this application for your convenience.

We are also enclosing some blank forms C-128, which Rule 1107 states must accompany Form C-104 for a gas well in triplicate showing the location of the well with respect to the outer boundaries of the Section, the acreage to be dedicated to the well and the location of all other wells, both oil and gas, located within the area of said plat.

When administrative approval has been granted for a non-standard proration unit and a Notice of Connection has been submitted to this office by your transporter, the subject well will be granted an allowable and placed on the gas proration schedule.

Since this well is outside the boundaries of designated pool producing from the Queen formation, please file the original and one copy of the enclosed Form C-123 requesting an extension of the pool.

Yours very truly,

OIL CONSERVATION COMMISSION

R. F. Montgomery
