OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the

Rowan Oil Company Walden Well No. 6 in NW 1/4 of NW 1/4
Company or Operator Lease
of Sec. 15, T. 22S, R. 37E, N. M. P. M., Brunson Field.
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

Due to the decrease in production from the lower Ellenburger in this well, and the fact that there is no longer a commercial well in this zone, we propose to plug back and recomplete as follows:

Pull tubing and set bridge plug at 7702' and cover with 5' cement. Then perforate casing with four jet shots per foot from 7655' to 7680'. Run tubing in hole with packer, swab tubing dry, and acidize.

In the event the above section fails to produce in commercial quantities, we propose to set bridge plug at 7580', and perforate with four jet shots per foot from 7530 to 7550' in the Joins. Run tubing, acidize and swab to completion.
