Re: Repair of Casing on
Coke A #5-I
Section 26, T22S, R37E

Gentlemen:

The recent submitted packer leakage test of March 19, 1963 indicates substantial pressure drop and suggests that communications might exist.

We request that further tests be conducted and a C-102 be submitted for remedial measures.

The Commission must be notified when these measures are to be commenced.

Very truly yours,

OIL CONSERVATION COMMISSION

Joe D. Ramey
