

Memo

From
VICTOR T. LYON
Chief Petroleum Engineer
9-8-89

To Evelyn Downer

Exxon New Mexico "V" State 11-K-10-215-37E
Chevron Cole A #6-B-16-225-37E

both in Blinbury pool have been
shown "NC" on the last 5 gas
production schedules. Is something
wrong with the paper work?
Please check and let me know.

9-18-89

Chevron Cole A #6-B 16-22-37 is an oil
well & has an oil allowable in the
Blinbury Pool. No change is in order.

Exxon New Mexico V State #11-K 10-21-37
is no longer. That well is an injection
well in Shell NE OK'd at #583.

Do not understand why these showed up as
new connects.

Oil Conservation Division Santa Fe, New Mexico 87504-2088
