

NEW MEXICO OIL CONSERVATION COMMISSION
Santa Fe, New Mexico

REQUEST FOR PERMISSION TO CONNECT WITH PIPE LINE

This request should be SUBMITTED IN TRIPLICATE. See instructions in the Rules and Regulations of the Commission.

Hobbs, New Mexico

2-22-39

Place

Date

OIL CONSERVATION COMMISSION,
 Santa Fe, New Mexico.

DUPLICATE

Gentlemen:

Permission is requested to connect Gulf Oil Corporation Cole B State
Company or Operator Lease
 Well No. 4 in C SW¹ NW¹ of Sec. 16, T. 22, R. 37, N.M.P.M.
Penrose Field, Lea County, with the pipe line of the
Shell Pipe Line Co. Hobbs, New Mexico
Pipe Line Co. Address

Status of land (State, Government or privately owned) State

Location of tank battery C NW¹

Description of tanks 4 - 500 barrel steel

Logs of the above wells were filed with the Oil Conservation Commission _____, 19____

All other requirements of the Commission have ~~been~~ been complied with. (Cross out incorrect words.)

Additional information:

Yours truly,

Permission is hereby granted to make pipe line connections requested above.

OIL CONSERVATION COMMISSION,
 By A. ANDREAS
State Geologist
Member Oil Conservation Com.

 Position District Superintendent
 Address Hobbs, New Mexico

THE EFFECT OF THE RATE OF CHANGE OF THE LENGTH OF THE ROD ON THE STRESS DISTRIBUTION

BY DR. A. A. KULEVSKII, Leningrad University

It is shown that the rate of change of the length of the rod has a significant effect on the stress distribution in the rod. The effect is more pronounced in the case of a rod with a variable cross-section.

The problem of the effect of the rate of change of the length of the rod on the stress distribution is of interest in the theory of the dynamics of the rod. It is known that the rate of change of the length of the rod has a significant effect on the stress distribution in the rod.
