Re: Application for Exception
No-Flare Order R-553

Oil Conservation Commission
State of New Mexico
Santa Fe, New Mexico

Gentlemen:

Neville G. Penrose, Inc. respectfully requests that the Oil Conservation Commission grant an exception to No-Flare Order R-553 insofar as it pertains to Neville G. Penrose, Inc. State "C" #1 and in support thereof states the following facts:

The State "C" #1 well is located 1981.5' from the west line and 1980' from the north line of section 17, T22S, R37E, Lea County, New Mexico and was completed October 8, 1957 in the Eumont Pool. The well produced at the rate of 54.1 barrels of oil per day with a gas-oil ratio of 2639 cubic feet per barrel. An allowable of 37 barrels per calendar day was assigned.

Skelly Oil Company has been contacted regarding purchase of this gas, as indicated in the attached letter. As of this date Skelly states that they expect to make a connection by March 1, 1958. This application is to make disposition of the casinghead gas until such time as the connection can be made.

In view of the foregoing and to keep the well on production, and thereby protect correlative rights, it is requested that the Oil Commission issue an exception to its No-Flare Order R-553 with respect to a volume of approximately 95 MCF per day of low pressure casinghead gas which will be vented from Neville G. Penrose, Inc. State "C" #1.

Yours truly,
NEVILLE G. PENROSE, INC.

Glenn G. Neill
