1. The first part of the exam is a multiple-choice section. It consists of 25 questions, each worth 4 points, for a total of 100 points. The questions cover a wide range of topics in physics, including mechanics, electromagnetism, and quantum mechanics. The second part of the exam is a free-response section. It consists of 3 questions, each worth 20 points, for a total of 60 points. The questions are more challenging and require a deeper understanding of the concepts covered in the first part.
