

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

THEORY OF THE EARTH

CHAPTER I. OF THE ORIGIN OF THE EARTH.

The origin of the earth is a subject which has long attracted the attention of philosophers and astronomers. The various hypotheses which have been proposed, and the arguments in support of them, are here presented in a clear and concise manner. The reader will find a full and complete account of the different theories, and the reasons for their acceptance or rejection. The subject is treated in a systematic and methodical manner, and the reader will be enabled to form a correct opinion of the truth of the matter.

The first hypothesis which is mentioned is that of the spontaneous generation of life. This theory is now generally abandoned, and is considered to be a mere speculation. The second hypothesis is that of the creation of life by a divine being. This theory is still maintained by many people, but it is not supported by any scientific evidence. The third hypothesis is that of the evolution of life from a common ancestor. This theory is now generally accepted, and is supported by a large amount of scientific evidence.

The fourth hypothesis is that of the migration of life from one planet to another. This theory is still a matter of speculation, but it is not impossible. The fifth hypothesis is that of the creation of life by a divine being, and the migration of life from one planet to another. This theory is still a matter of speculation, but it is not impossible.

The sixth hypothesis is that of the creation of life by a divine being, and the migration of life from one planet to another. This theory is still a matter of speculation, but it is not impossible. The seventh hypothesis is that of the creation of life by a divine being, and the migration of life from one planet to another. This theory is still a matter of speculation, but it is not impossible. The eighth hypothesis is that of the creation of life by a divine being, and the migration of life from one planet to another. This theory is still a matter of speculation, but it is not impossible.

The ninth hypothesis is that of the creation of life by a divine being, and the migration of life from one planet to another. This theory is still a matter of speculation, but it is not impossible. The tenth hypothesis is that of the creation of life by a divine being, and the migration of life from one planet to another. This theory is still a matter of speculation, but it is not impossible.

The eleventh hypothesis is that of the creation of life by a divine being, and the migration of life from one planet to another. This theory is still a matter of speculation, but it is not impossible. The twelfth hypothesis is that of the creation of life by a divine being, and the migration of life from one planet to another. This theory is still a matter of speculation, but it is not impossible.

The thirteenth hypothesis is that of the creation of life by a divine being, and the migration of life from one planet to another. This theory is still a matter of speculation, but it is not impossible. The fourteenth hypothesis is that of the creation of life by a divine being, and the migration of life from one planet to another. This theory is still a matter of speculation, but it is not impossible.

The fifteenth hypothesis is that of the creation of life by a divine being, and the migration of life from one planet to another. This theory is still a matter of speculation, but it is not impossible. The sixteenth hypothesis is that of the creation of life by a divine being, and the migration of life from one planet to another. This theory is still a matter of speculation, but it is not impossible.
