WILDERNESS MANAGEMENT PLAN

The purpose of this plan is to provide for the management of the wilderness area in a manner that will preserve its natural resources and provide for the enjoyment of the public. The plan is based on the following principles:

1. Preservation of Natural Resources

The first principle is the preservation of the natural resources of the wilderness area. This includes the preservation of the land, water, and wildlife resources.

2. Public Enjoyment

The second principle is the provision of public enjoyment of the wilderness area. This includes the provision of recreational opportunities and the protection of the area from unauthorized activities.

3. Protection of the Area

The third principle is the protection of the wilderness area from unauthorized activities. This includes the protection of the area from logging, mining, and other activities that would destroy the natural resources.

4. Management of the Area

The fourth principle is the management of the wilderness area in a manner that will preserve its natural resources and provide for the enjoyment of the public.

5. Public Access

The fifth principle is the provision of public access to the wilderness area. This includes the provision of trails and other facilities that will allow the public to enjoy the area.

6. Education and Interpretation

The sixth principle is the provision of education and interpretation to the public. This includes the provision of information about the natural resources of the area and the importance of preserving them.

7. Research

The seventh principle is the provision of research to the public. This includes the provision of information about the natural resources of the area and the importance of preserving them.

8. Management of the Area

The eighth principle is the management of the wilderness area in a manner that will preserve its natural resources and provide for the enjoyment of the public.

9. Public Access

The ninth principle is the provision of public access to the wilderness area. This includes the provision of trails and other facilities that will allow the public to enjoy the area.

10. Education and Interpretation

The tenth principle is the provision of education and interpretation to the public. This includes the provision of information about the natural resources of the area and the importance of preserving them.
