THEORY OF THE EARTH

CHAPTER I. OF THE ORIGIN OF THE EARTH.

The first question which presents itself to the mind is, what was the origin of the earth? and the answer to this question is, that it was created by the power of God, out of nothing, at the beginning of time.

The second question is, how long did it take to create the earth? and the answer to this question is, that it took six days, as is related in the Bible.

The third question is, what was the state of the earth at first? and the answer to this question is, that it was a dark, formless, and void mass.

The fourth question is, how did the earth become habitable? and the answer to this question is, that it was made habitable by the power of God, who created all the plants and animals.

THEORY OF THE EARTH.

CHAPTER II. OF THE HISTORY OF THE EARTH.

SECTION I.

The first period of the history of the earth is, the time from the creation of the earth to the present day. This period is divided into three ages, the primary, the secondary, and the tertiary.
