On 12/16/96 we added perforations 5617' - 5843' (71 holes) to the Blinebry. On 12/30/96, we fracture treated the well. After producing the well and running a potential test, the GOR shows that this well should now be carried in the Blinebry Oil and Gas (06660) rather than in the Blinebry Oil & Gas (Pro Gas) (72480). As of January 1997, we will no longer show production from the Blinebry (Pro Gas) on our C-115 reports. It will be reported in the Blinebry Oil & Gas (06660) instead.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
