Oil Conservation Division  
P. O. Box 2088  
Santa Fe, New Mexico 87501  
Attn: Division Director

Re: Non-Standard Gas Proration Unit, Tubb Gas Pool,  
J. L. Muncy Well No. 1, Lea County, New Mexico.

Dear Sir:

Marathon Oil Company requests administrative approval for a non-standard gas proration unit for the J. L. Muncy Well No. 1. The legal description of this well is as follows:

660' FEL & 660' FSL  
Unit P, Section 24, T22S, R37E  
Lea County, New Mexico

A non-standard gas proration unit consisting of the E/2 SW 1/4 and the S/2 SE 1/4 is requested for this well. Administrative approval is required for this 160 acre unit because it crosses quarter section lines. There is one other Tubb gas well located on this lease. The J. L. Muncy Well No. 6 is one location north of Well No. 1 in Unit I. This is a newly drilled well. Production from Well No. 6 is 1.4 MMCFPD, while Well No. 1 produces 111 MCFPD.

Offset operators have been notified as required by special pool rules for the Tubb Oil and Gas Pool. Copies of the letter and the receipts are enclosed. If any further information is needed, please contact this office. Thank you.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Thomas F. Zapatka'.

All dimensions must be from the outer boundaries of the Section.

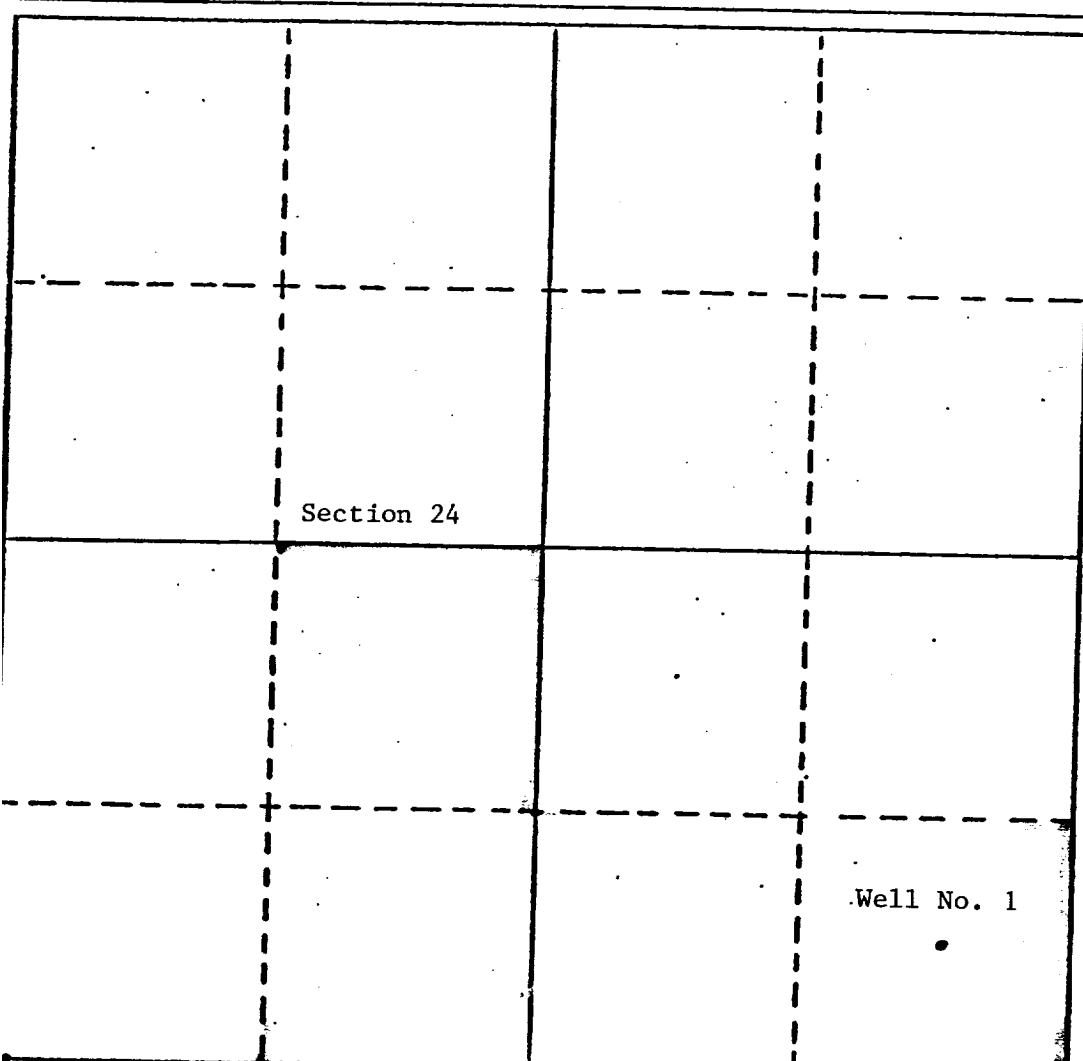

Operator Marathon Oil Company			Lease J. L. Muncy			Well No. 1		
Unit Letter P	Section 24	Township 22S	Range 37E	County Lea				
Actual Footage Location of Well: 660 feet from the East line and 660 feet from the South line								
Ground Level Elev. 3321	Producing Formation Tubb		Pool Tubb Gas			Dedicated Acreage: 160 Acres		

1. Outline the acreage dedicated to the subject well by colored pencil or hachure marks on the plat below.
2. If more than one lease is dedicated to the well, outline each and identify the ownership thereof (both as to working interest and royalty).
3. If more than one lease of different ownership is dedicated to the well, have the interests of all owners been consolidated by communitization, unitization, force-pooling, etc?

☐ Yes ☐ No If answer is "yes," type of consolidation \_\_\_\_\_

If answer is "no," list the owners and tract descriptions which have actually been consolidated. (Use reverse side of this form if necessary.) \_\_\_\_\_

No allowable will be assigned to the well until all interests have been consolidated (by communitization, unitization, forced-pooling, or otherwise) or until a non-standard unit, eliminating such interests, has been approved by the Division.

Re: Non-Standard Gas Proration Unit,  
J. L. Muncy Well No. 1 (Tubb Gas)  
Section 24, T22S, R37E  
Lea County, New Mexico

Dear Sir;

Marathon Oil Company has requested the Oil Conservation Division for administrative approval for a non-standard gas proration unit for the J. L. Muncy Well No. 1. The exact legal description for this well is as follows:

660' FEL & 660' FSL  
Unit P, Section 24, T22S, R37E  
Lea County, New Mexico

The pool rules for the Tubb Oil & Gas Pool require gas wells to be located on a tract consisting of 160 surface acres in the form of a square, which is a quarter section. The proposed acreage dedication is illustrated on the attached Form C-102. This non-standard unit is the result of a newly drilled Tubb completion located just north of Well No. 1. Production from this new well, J. L. Muncy Well No. 6, tested at a rate of 1.4 MMCFPD; Well No. 1 produces 111 MCFPD.

As stated in the Special Pool Rules for the Tubb Oil & Gas Pool, the Division Director may grant approval to this application provided no offset operator has entered an objection within 30 days after receiving the application. If you have any questions regarding this matter, please contact this office. Thank you.

Sincerely,
