RE: Marathon Oil Co.
J.L. Muncy #2-K Sec. 24, T22S R37E
Tubb Pool

The Tubb zone was abandoned in Aug. 1984 and the gas allowable cancelled by supplement SE 4909, copy of supplement attached.

You currently list this well in the Tubb gas pool and are showing production. Do not understand this.

The well is also a Blinebry gas and you have it listed in that pool but you show no production. The Blinebry is the zone that is still producing according to the operator. They report production each month in Blinebry Pool on their C-115.

See if you can figure out what is going on.
