Gentlemen:

DC 630

I have examined the application dated 6/20/58  
for the Ohio Oil Co. J. L. Muncy #2 24-22-37  
Operator Lease and Well No. S-T-R

and my recommendations are as follows:

It will be necessary to install adequate equipt. (i.e. circulating valves  
side door chokes or other) to assure proper control & separating zones\_\_E.J.F.  
O.K. Geologically--J.W.R.

Yours very truly,

Dear Sir:

O  
The Ohio Oil Company respectfully requests that the Oil Conservation Commission of New Mexico grant this application of Ohio for authorization to dually complete its J. L. Muncy Well No. 2, in Section 24, Township 22-S, Range 37-E in the Drinkard Pool, Lea County, New Mexico.

P  
This well is presently producing in the Drinkard pay. Ohio is desirous of abandoning well No. 2 in the nearly depleted Drinkard pay by squeeze cementing, and dually completing the Tubbs and Blinbry gas zones in such a manner as to produce the Blinbry gas through the annulus between the tubing and casing, and the Tubbs gas through the tubing. Ohio intends to install such efficient packer in this well and perform completion of this well in such a manner as will prevent waste in either reservoir.

Y  
Subsequent to completion of the work, Ohio will present data showing the completion program on this well and plans for future tests to be made regularly to determine that waste is not occurring in either reservoir.

Application is being made to revise existing units and create additional units contingent on the successful dual completion of this well.

Respectfully submitted,

THE OHIO OIL COMPANY
