

OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below.

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF	X	REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL

OIL CONSERVATION COMMISSION,
SANTA FE, NEW MEXICO
Gentlemen:

Following is a report on the work done and the results obtained under the heading noted above at the

Well No. _____ in the _____
 Drinker Company or Operator 25 Day 37E
 Drinker of Sec. _____, T. _____, R. _____, N. M. P. M.,
 Field, 4/26/48 County.

The dates of this work were as follows: _____

Notice of intention to do the work was (was not) submitted on Form C-102 on 4/19/48
 and approval of the proposed plan was (was not) obtained. (Cross out incorrect words.)

DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

1163 ft. of 8 5/8ths inch casing was run and cemented with 450 sks. of cement on 4/26/48. The cement was allowed to set until 4/29/48 when the plug was drilled and tested and found to be O.K.

We changed our plan of casing operation as was submitted on Form 102 4/19/48. At that time we had intended to run 300 ft. of 13 3/8ths inch casing. We will now use the above as the surface casing and then when we run our oil string will set a retainer and perforate and squeeze cement through the Salt Section. R. Olsen Oil Co. Geologist
