

OIL CONSERVATION COMMISSION

HOBBS, NEW MEXICO

May 13, 1957

Mr. A. L. Porter, Jr., Director  
Oil Conservation Commission  
Box 871  
Santa Fe, New Mex.

Dear Mr. Porter:

Your letter of May 8, 1957 requested that this office check the present status of the Western Oil Fields, Inc. Amanda Sims No. 1-I in section 25, T-22-S, R-37-E.

This well is presently a dual completion in the Drinkard and Tubb formations as authorized by DC Order No. 65. However by gas supplement No. 17 SE dated December 26, 1956 this well was removed from the gas schedule due to lack of production since 1954.

Upon receipt of your letter Mr. Paul White of Western Oil Fields, Inc. was contacted in regard to this matter. Mr. White has informed me that the well was perforated 100 feet to low in the Tubb section, and is not capable of producing into the gas system. However due to the smallness in size of their tract and apparent inability to communitize with offset operators, no remedial work has been contemplated. However, Mr. White has assured me that a Form C-103 would be filed this date to set forth the above facts and request temporary abandonment of this zone.

Yours very truly,

OIL CONSERVATION COMMISSION

R. F. Montgomery  
Proration Manager
