Re: Langlie Mattix Penrose Sand Unit Tr. 33 #2-C  
Section 33, T22S, R37E

Gentlemen:

The temporary abandonment of the above-referenced well has been approved. As discussed we will need a report on this well every six months. This well is located in the R-5003 area and we conduct a bradenhead test on wells in this area in September each year. However, you will be required to take a pressure reading on the surface casing annulus and the production casing annulus in March each year and report the results to this office in writing. Send this information to attention of Bonnie Prichard.

Very truly yours,

OIL CONSERVATION DIVISION

  
Jerry Sexton  
Supervisor, District I

JS/ed
