

## NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

## MISCELLANEOUS REPORTS ON WELL

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-offs, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF	<b>X</b>	REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL

# THEORY OF THE EARTH

CHAPTER I

THE EARTH AND ITS HISTORY

The Earth is a planet of the solar system, and is the only one of the planets which is known to support life. It is a sphere, and is composed of a solid inner core, a liquid outer core, and a solid outer shell. The inner core is composed of iron and nickel, and is about 1,200 miles in diameter. The outer core is composed of iron and nickel, and is about 1,400 miles in diameter. The outer shell is composed of various rocks and minerals, and is about 2,000 miles in diameter.

The Earth is divided into four main parts, or continents, which are Asia, Europe, Africa, and America.

The Earth is also divided into many smaller parts, or countries, which are separated by rivers, mountains, and seas. The countries of the world are divided into many smaller parts, or states, which are separated by rivers, mountains, and seas. The states of the world are divided into many smaller parts, or counties, which are separated by rivers, mountains, and seas.

The Earth is also divided into many smaller parts, or towns, which are separated by rivers, mountains, and seas.

The Earth is also divided into many smaller parts, or villages, which are separated by rivers, mountains, and seas. The villages of the world are divided into many smaller parts, or hamlets, which are separated by rivers, mountains, and seas. The hamlets of the world are divided into many smaller parts, or farms, which are separated by rivers, mountains, and seas.

The Earth is also divided into many smaller parts, or fields, which are separated by rivers, mountains, and seas. The fields of the world are divided into many smaller parts, or plots, which are separated by rivers, mountains, and seas. The plots of the world are divided into many smaller parts, or acres, which are separated by rivers, mountains, and seas.

The Earth is also divided into many smaller parts, or farms, which are separated by rivers, mountains, and seas. The farms of the world are divided into many smaller parts, or fields, which are separated by rivers, mountains, and seas. The fields of the world are divided into many smaller parts, or plots, which are separated by rivers, mountains, and seas.
