Re: LMPSU Tract 35 #3-B, Sec. 33, T22S, R37E

Dear Mr. Winker:

I have received and evaluated the information on the sundry notice and chart which you submitted on the above referenced injection well.

Due to the fluctuation of the pressures recorded on the chart, I request that you conduct another pressure test to confirm the condition of the well.

Also, to clarify the results, I request that you pressure up to 500#.

I request that you perform this procedure no later than February 15, 1998.

In order for an OCD representative to witness the operation, I request that you notify this office 24 hours prior to the test.

Very truly yours

OIL CONSERVATION DIVISION
