

NEW MEXICO OIL CONSERVATION COMMISSION
Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF	X	REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL			

Midland, Texas

1. The first step in the process of identifying and evaluating potential risks is to identify the risks. This is done by conducting a risk assessment, which involves identifying the risks, assessing their likelihood of occurrence, and determining their potential impact. The risk assessment is a key tool in the risk management process, as it provides a clear understanding of the risks and their potential consequences. Once the risks have been identified, the next step is to evaluate them. This involves determining the likelihood of the risks occurring and the potential impact they could have. This is done by comparing the risks to a set of criteria, which are typically based on the organization's risk tolerance. Once the risks have been evaluated, the next step is to develop a risk management plan. This plan should outline the steps that will be taken to manage the risks, including the identification of risk owners, the development of risk mitigation strategies, and the implementation of risk monitoring and reporting mechanisms. Finally, the risk management plan should be reviewed and updated regularly to ensure that it remains effective and relevant.
