Hobbs, New Mexico

Gentlemen:

Effective March 1, 1968 your Gulf State Well No. 1 located in Unit A of Section 36, T-22-S, R-37-E is classified as a gas well in the Blinebry Gas Pool. This classification is based on your December, 1967 production information wherein you reported 566 barrels of oil and 29,932 MCF of gas for a producing gas-liquid ratio of 52,883 cubic feet per barrel.

If by March 1st this office receives notice that this well is being separately metered by a gas transporter, and if a new Form C-102 showing acreage dedicated to the well is submitted, then an appropriate gas allowable will be assigned effective March 1. However, should you not submit this information it will be necessary that the well be shut in and remain shut in until proper procedures as outlined have been fulfilled.

Yours very truly,

OIL CONSERVATION COMMISSION
