Re: Recompletion  
State A A/c-1 #77-B  
Sec. 14, T23S, R36E

Gentlemen:

We have approved your intention to recomplete the above-referenced well from present Queen completion to the Yates-Seven Rivers. Your proposed perforations will come under the Jalmat-Tansill-Yates-Seven Rivers Pool.

Should the well be a gas well it will share the 160 acre proration unit with #13-H. It will be necessary for you to obtain permission for simultaneous dedication of this 160 acre proration unit to both wells. This can be done administratively through our Santa Fe office.

If the recompletion work results in an oil well completion you will need to have the 160-acre proration unit dedicated to #13 reduced to 120 acres so you can dedicate 40 acres to #77.

If the well is completed as a gas well you will need to submit revised acreage dedication plat for #13-H and #77-B spotting both wells on each plat.

If you have any questions, please feel free to call Evelyn Downs at (505) 393-6161.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton  
Supervisor, District I

ed

*X-89 make Stegner. Santa Fe OK and simultaneous dedication  
not required if loc is standard for both wells.  
with both wells spotted in separate*
