Midland, Texas 79701

Gentlemen:

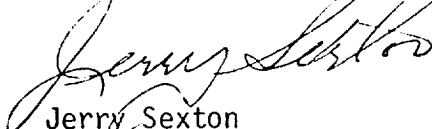

The 1977 gas-oil ratio test for your State "A" A/c 1 Well No. 78 located in Unit G of Secion 14, T-23-S, R-36-E, Langlie Mattix Pool, showed 1 barrel of oil and 120 MCF gas, with a ratio of 120,000/1. The following production was reported on Form C-115, however:

	Oil <sup>19</sup>	Gas <sup>1386</sup>
January	37 bbls.	553 MCF
February	9 bbls.	675 MCF
March	142 bbls.	3625 MCF
April	374 bbls.	4909 MCF
May	381 bbls.	4724 MCF

According to these production figures the well should be classified as an oil well, rather than as a gas well as it now is. Please advise as to the discrepancies in reports, and which is correct.

Yours very truly,

OIL CONSERVATION COMMISSION

  
Jerry Sexton  
Supervisor, District 1
