

## OIL CONSERVATION DIVISION

[illegible]

CLASS OF U.S. PAT. - INVENTION / REINVENTION - SERIAL NO.

This is reported to the Public Relations Division of the following:

for each  $i \in \mathcal{I}$  and  $j \in \mathcal{J}$  from the

Manuscript received 11 September 1991; accepted 11 April 1992.

State A will...

210746  
 Tetracycline / S. C. Kado

8- 15 - 28 - 36  
 and No. 141 - T - 8

Amount payable for a certain rate of time was:

$$\frac{d}{dt} \left( \frac{\partial L}{\partial \dot{x}} \right) = \frac{\partial L}{\partial x}$$

viii

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The *Agrobacterium* strains were grown in the YEA medium for 24 h at 28 °C. The cell concentration of the strains was adjusted to 10<sup>8</sup> cells/ml. The cell suspension was mixed with the plant tissue and the transformation efficiency was determined. The results were expressed as the mean ± SD of three independent experiments. The asterisks indicate the significant difference between the strains at the same concentration of the cell suspension.
