June 28, 1955

Well No. 1 is located 660 ft. from N line and 660 ft. from E line of sec. 4  
Lot 5 of Sec. 4 22S 38E N.M.P.M.  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Wildcat Lea New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is \_\_\_\_\_ ft.

**DETAILS OF WORK**

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this test to the San Andres Pay. We propose to drill to 2800' with rotary tools, set salt string casing, move rotary tools off and drill to T.D. of 4400' with cable tools.

We propose the following casing program and cement time:  
 13-3/8" 48lb new casing at 150' with 175 sacks and 36 hours set time:  
 8-5/8" 28lb new casing at 2800' with 300 sacks and 48 hours set time:  
 If the San Andres indicates production we will run 4400' 15 1/2 lb new casing and cement with 125 sacks and 72 hours set time.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
