Re: Application to Dually Complete
Cosden Petroleum Corporation's
Edith Butler No. 2 and No. 3,
Brinkard Pool, S/2 NW/4 Section
18, T-22-S, Range 30E, Lea Co.,
New Mexico.

Gentlemen:

Cosden Petroleum Corporation respectfully requests permission to dually complete its Edith Butler No. 2 and No. 3, located in Section 18-22N-30E, Lea County, New Mexico. Both wells produce from the Brinkard pay at present.

Well No. 2 would be completed so that Tubbs gas would be produced through the casing-tubing annulus and the Brinkard oil zone would continue to be produced through the tubing.

Well No. 3 would be completed so that Blinberry gas would be produced through the casing-tubing annulus and the Brinkard zone would continue to be produced through the tubing.

Cosden would install efficient packers and other subsurface devices, and perform the completions in such a manner as to prevent communication between reservoirs, and also to prevent waste. A schematic diagram showing the proposed method for dual completion and an electric log of each well are attached, as well as a map showing the location of Cosden's Edith Butler lease and offset operators' leases. By a copy of this letter, all offset operators are notified of this application.

Cosden also requests administrative approval for an NEP for both of these deals, in exception to Rule 5A of R-610 as provided for in Rule 5B of Order R-610. As may be seen from the attached plat of our lease, there are 80 acres which are available to be assigned to each of these gas zones from Wells No. 2 and No. 3; that is the S/2 of the NW/4 of Section 18. Approximately three years ago, we formed a 160-acre unit with Ohio Oil Company on the SW/4 of Section 18. About one year ago we approached The Texas Company concerning formation of a 160-acre gas unit for the NW/4 of Section 18,

CHRYSLER FINANCIAL CORPORATION

NEW YORK, N.Y.

January 1, 1970

Dear Mr. [Name]:

Thank you for your letter of December 15, 1969.

I am sorry that I cannot give you a more definitive answer at this time.

As you know, the Company is currently reviewing its financial position and the impact of the new tax laws on its operations. This review is being completed as quickly as possible, and we will be in a position to give you a more definitive answer as soon as the review is completed.

Sincerely,

I am sure that you will understand the need for this review and the importance of getting the Company's financial position straightened out. We will be in touch with you again as soon as the review is completed.

I am sure that you will understand the need for this review and the importance of getting the Company's financial position straightened out. We will be in touch with you again as soon as the review is completed.

but they were not interested. Therefore, we wish to proceed with our plans to deal these wells on the basis of 80-acre spacing.

Subsequent to completion of this work, Coeden would present data showing progress during these completions, and would comply with all the rules and regulations of the New Mexico Oil Conservation Commission.

Very truly yours,

L. M. Thompson
