Due Aug 13

July 29, 1954

Mr. W. B. Macey
New Mexico Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Dear Mr. Macey:

The Ohio Oil Company respectfully requests that the Oil Conservation Commission of New Mexico grant this application of Ohio for authorization to dually complete its Edith Butler "A" No. 1, located in Section 18, Township 22-S, Range 38-E, now producing in the Drinkard Pool, Lea County, New Mexico.

The Ohio desires to dually complete this well in the Blinebry gas zone in such a manner as to produce gas through the annulus between the casing and the tubing, and to continue producing Drinkard oil through the tubing. The Ohio intends to install an efficient packer and to perform the completion so as to prevent waste in either reservoir. A schematic diagram showing the proposed method for dual completion is attached, as well as a map showing the location of the Ohio lease with the leases of offset operators. Each of these offset operators has been notified of this application.

The Blinebry gas zone has been communitized to form a 160 acre drilling block, the SW/4 of Section 18, with the Cosden Petroleum Corporation.

Subsequent to completion of the work, Ohio will present data showing the detailed completion program as well as plans for future testing which will be made regularly to determine that waste is not occurring in either reservoir.

Respectfully submitted,

THE OHIO OIL COMPANY

Thomas A. Steele
Assistant District Petroleum Engineer
