> Re: Application to Dually Complete Gulf Oil Corporation's Gutman No. 1, Drinkard Pool, Lea County, New Mexico as Tubb Gas-Blinebry Gas Producer.

Gentlemen:

By this letter of application, Gulf Oil Corporation wishes to state the following:

(a) That Gulf Cil Corporation's Gutman No. 1, located in the C SE/4 SW/4 of Section 19-22S-38E, is completed at a plug back total depth of 6480'. The attached Exhibit "A" shows the location of this well on the Gulf Oil Corporation's Gutman Lease together with the location of all offset wells.

(b) That subject well has  $5\frac{1}{2}$ " casing set at 7005' and cemented with 775 sacks of cement. The top of the cement behind the  $5\frac{1}{2}$ " casing is at 2800'. The well is an oil well producing from the perforated interval 6280-6480' in the Drink- ard Pool.

(c) That the applicant proposes to dually complete the well in the following manner:

- (1) Plug back by squeeze cementing to an approximate depth of 6240'.
- (2) Perforate the 51" casing within the approximate interval 6080-6185' in the Tubb Gas Pool.
- (3) Perforate the  $5\frac{1}{2}$ " casing within the approximate interval 5490-5625' in the Blinebry Gas Pool.
- (4) Produce the Tutb Pool gas through the tubing and the Blinebry Pool gas through the tubing-casing annulus.

(d) That the granting of this application for permission to produce the well as a dual completion with gas from the Tubb and gas from the Blinebry is in the interest of conservation and the protection of correlative rights.

(e) That the applicant will comply with all rules and regulations of the New Mexico Oil Conservation Commission to maintain separation of production from the two pay zones.
