P. O. BOX 2167
Hobbs, New Mexico

December 28, 1954

New Mexico Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Gentlemen:

New Mexico Oil Conservation administrative Order No. DC 153 granted authority to dually complete Gulf Oil Corporation Gutman No. 2 to produce oil from the Drinkard formation and gas from the Tubb formation.

The Drinkard formation has been found commercially unproductive in subject well. Therefore, it is requested that permission be granted to deviate from terms granted in Order DC 153 and permit the Gulf Oil Corporation to dually complete the well in the Blinebry and Tubb gas horizons after properly plugging the Drinkard zone. Proposed perforated intervals are from 5950' to 6250' in the Tubb and from 5500' to 5615' in the Blinebry.

Respectfully submitted,

C. F. TAYLOR
AREA SUPERINTENDENT OF PRODUCTION
