13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Texaco requests an extended TA status for the above well. The following procedure to test casing and plug integrity was performed 1/23/95.

1. Pressure tested casing and plug with 500 psi for 30 min <held>. Test was witnessed by Pat Hutchins of the BLM 1/23/95.

2. Classify well to TA status.

The original pressure chart was sent to the NMOCD and a copy can be found on the reverse side of this form.

Justification: Given the good size and condition of the wellbore and the particular location of the Blinebry #10 Texaco is currently evaluating the possibility of converting the subject well to a salt water disposal well.

The standard one year time period for TA status should be adequate time for thorough evaluation.
